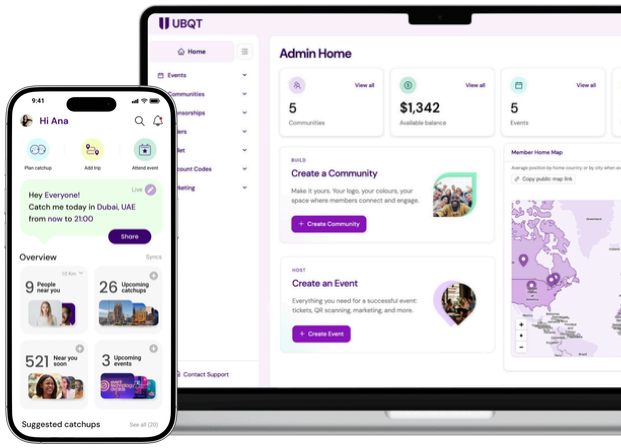
UBQT FOR EMPLOYEE WELLBEING

joinubqt.com/employee-engagement-platform

AI-powered social wellbeing and real-life employee connection

Manage loneliness. Build belonging.



UBQT is the social infrastructure for modern teams. AI-powered, real-life-first. We connect employees across floors, cities, and time zones, turning proximity into belonging, and belonging into retention

THE PROBLEM

Loneliness is already in your building.

1 in 5 employees report feeling lonely at work, with remote workers and younger employees most affected. There's a growing sense of isolation that needs to be addressed.

THE SHIFT

From perk to people strategy.

Social wellbeing is now a recognised pillar of holistic health. Organisations that invest in real-life connection see measurable gains in retention, productivity, and team cohesion.

THE OUTCOME

A workforce that connects.

When employees build real relationships, they stay longer, perform better, and bring more of themselves to work. UBQT makes that happen at scale.

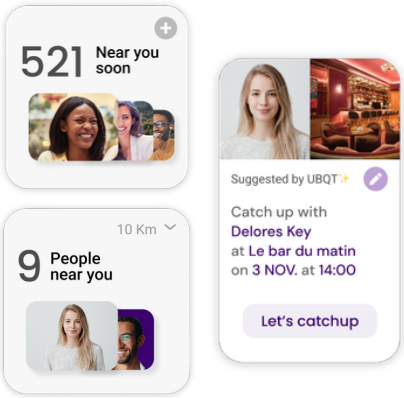
UBQT: STRENGTHENING HUMAN RELATIONSHIPS WITHIN ORGANISATIONS

The strongest organisations are not only productive. They're connected.

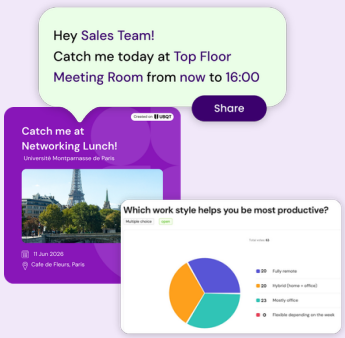


THE PROBLEM

While companies invest heavily in communication tools, very few solutions are designed to create meaningful human interactions in real life. Many corporate wellbeing programs respond with the same toolkit: mental health apps, fitness expenses, digital check-ins. All useful. But none of them put two colleagues in the same room.

OUR SOLUTION

UBQT is the activation layer for social health, turning proximity, shared context, and community into real-life moments that increase over time. UBQT is not a replacement for your existing wellbeing stack. It's the piece that makes the rest of it work.



Features built for people managers

AI-powered matching
Suggests the right colleagues to meet based on shared interests, projects, location, and career stage.

Real-time proximity alerts
Employees discover who is nearby: at the office, on a client site, or at a company off-site - and connect instantly.

Smart catchup scheduling
Calendar sync and one-tap planning make spontaneous and planned meetups effortless, wherever people are.

Sub-communities
Secure, focused groups for teams, leadership cohorts, or regional chapters.

Announcements and engagement tools
Push updates, gather pulse feedback, and keep your people informed and heard.

ROI, reporting and analytics
Real data on connections made, engagement trends, and community retention.
